PROFILE

Over the past ten years, I've built products for companies, businesses and government entities around the globe with a focus on design, usability, accessibility and inclusivity.

While the products I design have been in the built environment, the skills I have learned as an architect and designer are all applicable to front-end development. From working with multi-disciplinary teams, to iterating through design concepts and working with stakeholders, I am committed to meeting client expectations while creating great user experiences.
